Actuators

Integrated power actuator IPA 3505

AMTEC exclusively introduces the innovative, brand new IPA 3505 actuator unit with integrated generator. This unit can be operated in welding machines, opens entirely new possibilities to the users and offers various advantages for conception, building and production.

With the new IPA 3505 AMTEC continues to introduce new innovative ultrasonic components for the plastic processing industry. The advantages for the end-users and machine builders are always at the forefront of our efforts.
