Chain Conveyors

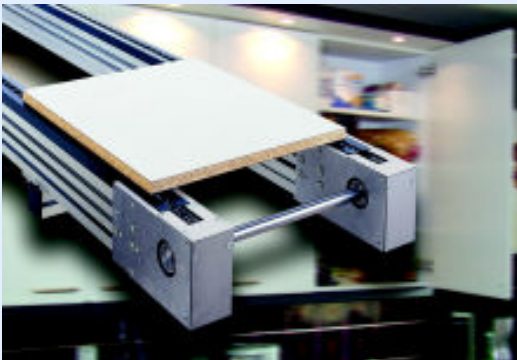

System KTF -P 2010

Chain conveyor KTF-P 2010 serves as the basic system component for the manufacture of single, dual or triple strand material handling systems. Chains run on our low friction wear strips and are designed for high load capacity.

- Design can be modified for the use of attachment chains
- Chain returns within the structural 50 x 100 mm profile.
- Loads up to 200 kg (higher on request)
- Constant and variable speed packages
- 200 - 2,000 mm widths, 500 - 10,000 mm lengths
- Head and Center Drive models available

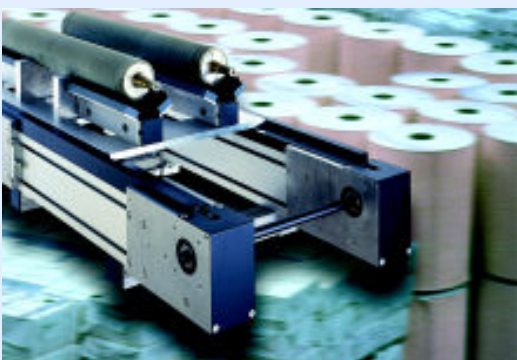

System SRF -P 2010

Low backpressure accumulating chain conveyor SRF-P 2010 is designed for the construction of medium-duty pallet handling system. The free running load rollers ensure quiet operation, including during product accumulation.

- Steel and plastic roller chains available
- Chain returns within the structural 50 x 100 mm profile.
- Loads up to 200 kg (higher on request)
- Constant and variable speed packages
- 200 - 2,000 mm widths, 500 - 10,000 mm lengths
- Head and Center Drive models available

System SRF -P 2012

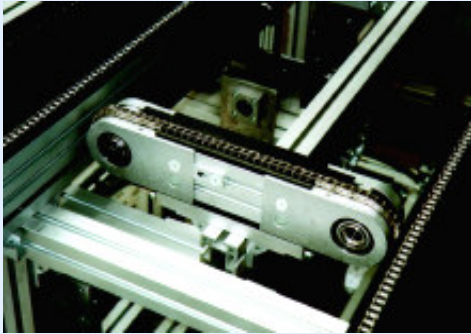

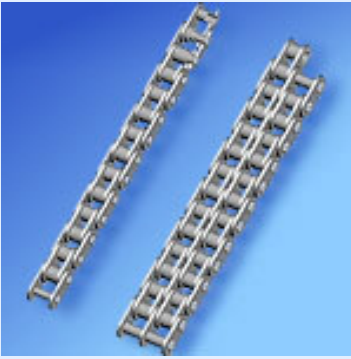

Low backpressure accumulating chain conveyor SRF-P 2012 is designed for the construction of heavy-duty pallet handling systems. The free running rollers ensure quiet operation and require minimal force for accumulation.

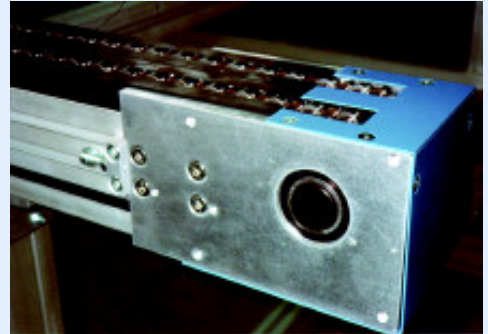

- Steel and plastic roller chains available
- Chain returns within the structural 60 x 135 mm profile.
- Loads up to 300 kg (higher on request)
- Constant and variable speed packages
- 200 - 2,000 mm widths, 1,000 - 10,000 mm lengths
- Several Head Drive models available

Chain Options

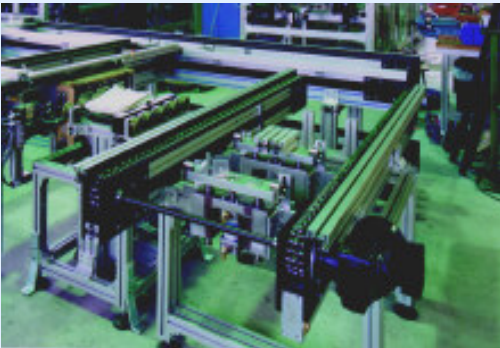

With AMTEC you have more than just standard chains at your disposal. We strive to include a large variety of manufacturers to accommodate whatever requirements you might have. Application specific types may include attachment chains, steel or plastic roller chains, etc.

Dual strand chain conveyor system with lift and transfer unit also chain conveyor.

Accumulating chain conveyor selected for zero backpressure accumulation. Ideal for loading, staging or storage.

Accumulating chain conveyor SRF-P 2012, with steel rollers for material handling system.
