

AMTEC

Applied Manufacturing Technologies, Inc.

Green 532nm Series for Flash-Lamp Lasers

This series is ideal for marking, micro-marching, highly reflective non-ferrous metals and alloys. It is also for inorganic non metals, ceramic, diamond, steel, and silicon materials.

- 100 Watts Q-Switched power
- Repetition rates up to 40 KHz
- TEMoo, Low Order or Multimode operations
- Focusable to small spot
- Upgradeable to 355 nm and 266 nm output

Green 532nm Series for Diode-Pump Lasers

This series is ideal for marking, micro-marching, highly reflective non-ferrous metals and alloys. It is also for inorganic non metals, ceramic, diamond, steel, and silicon materials.

- 40 Watts Q-Switched power
- Repetition rates up to 30 KHz
- 15 watts TEMoo & 40 watts Multimode operations
- Fully featured touch control interface panel
