

AMTEC

Applied Manufacturing Technologies, Inc.

Ultrasonic Lens Cleaning

Standard industry tubs

- Single and multiple cleaning station
- Sound and heat insulation
- Beveled work surface prevents liquid from dripping
- Beveled guides water condensation back to the tub
- Protection against dry running
- Ultrasound generator integrated into the device
- Temperature regulation
- Useful capacities of 50, 70, 110, 170, 250 liters
- Working frequencies 20, 25, 40 KHz
- Overflow edge with connection (set watertight)

Generators for ultrasonic cleaning

- Constant power output +/- 2%, regardless of level of fill, bath temperature, load and network fluctuations.
- Adjustable power outputs between 20% and 100%
- Fully automatic regulation and monitoring
- Optional communication via RS-232 or RS-485

Part Handling Systems

- Pick & Place unit with all tooling
- Customized to your specific needs
- Single and multiple cleaning stations
- Programmable with Touch Screen controls
- Precision X-Y & Z Positioning
