

AMTEC

Applied Manufacturing Technologies, Inc.

Vibration Welding

Main Features

- No maintenance high efficiency electromagnetic vibration head
- Auto tune of resonance frequency
- External communication
- Automatically maintaining the vibration amplitude
- Maximum output power limit
- Welding by time or travel
- Multi-stage weld process
- Easy to operate touch screen panel
- Sound level below 80 dba

Tooling Technology

- 5 CAD work stations
- Full data capability
- Complex 3D design, solid modeling or surface modeling
- Design meets automotive standards
- Dowel hole construction
- Serialized details
- As built drawings
- Full in-house CNC capability
